Hi Kyle,

Sorry for any confusion with my last email, but the first batch of permits, wells R26-R37 are all in Section 16. In the plat map, I used the large square as a square mile so each individual square was 660 feet. Some of the wells are a little above the North line on the map, but are not above the North section line. This is because Section 16 is not a perfect square mile, so that makes it fit on the plat map a little funny. The North lease line extends well into Section 9. You will see the northern lease line on some other permit applications we mailed a few days ago. I thought you were asking me about those yesterday, and some of those wells will have the AD or ADI name I was referring to. All of the R and RW wells will be in Section 16. If you would like, I can redo whatever plat maps you need me to.

I hope this helps!

Thanks,

Carissa

Hey Carissa,

All of the permit applications show section 16. The well locations that are in section 9 will need a new location map. Sorry to ask this but I need to see where the lease boundary is in section 9 and the distances to the well in addition to the nearest section lines. You don't have to use just the south or east section lines. I will need the new location map before I can proceed with the applications. The other permit application should be done today. Thanks

Call if you want to discuss. 573-368-2195

Hi Kyle,

Yes, the Belton Unit is in both section 16 and 9. The AD and ADI wells are all North of the highway in section 9. Before unitization, the lease was called the Abbey-Dunlap, hence "AD."

Let me know if you have any other questions!

Thanks,

Carissa

Brad,

It looks that some of the wells are in section 9 instead of 16. Are any of the wells north of highway 58?

Rows with red text indicate that the input location is too close to a boundary to provide reliable results.

NOTE: A result of 'NO VALUE' is usually an indication that no data was found for that location. For example, not every point in Missouri will lie within a municipality. Some will result in a 'NO VALUE'. If 'County Name' results in 'NO VALUE', the location probably lies outside the state.
